

DRAGAN SAVIC

Professor Savic is a founder and co-director of the Centre for Water Systems (www.ex.ac.uk/cws), in the College of Engineering Mathematics and Physical Sciences (CEMPS) at the University of Exeter, which is an internationally recognised group for excellence in water and environmental science research.

He is a Chartered Civil and Water Engineer with over thirty years' experience in research, teaching and consulting. He is elected Fellow of the Royal Academy of Engineering (UK), Member of the European Academy of Sciences, Fellow of the Institution of Civil Engineers, Fellow of the Chartered Institution of Water and Environmental Management, and Fellow of the International Water Association.

His research interests cover the interdisciplinary field of Hydroinformatics, which transcends traditional boundaries of water/environmental sciences, informatics/computer science (including Artificial Intelligence, data mining and optimisation techniques) and environmental engineering. Applications are generally in the hydro-environmental science/engineering areas, including water resources management (both quality and quantity), flood management, water and wastewater systems and environmental protection and management.

Professor Savic served as a Head of Engineering Department in CEMPS from 2010 until 2014, the Chair of the IAHR/IWA/IAHS Joint Committee on Hydroinformatics (2012-2015), and first as an Associate Editor and then the Editor-in-Chief of the Journal of Hydroinformatics from 2007 until 2015.
